User Story	Features
As a car owner I want to be notified by email if my car is involved in a recall so myself and my family can be safe	<ul style="list-style-type: none"> - Email Notification - Notification of recall on account when logged in
As a user of an online database where my personal information is stored, I want my data to be secure	<ul style="list-style-type: none"> - 2FA for access to account - Robust website security - Up to date backend/frontend software

As a user I want it to be easy and efficient to use the site to ensure I don't waste any time	<ul style="list-style-type: none"> - Logical UI/UX design - Logical workflows for users
---	---

2g.

Feature	Story Points
Email Notification	3
Notification of recall account when logged in	5
2FA for access to account	5
Robust website security	3
Up to date backend/frontend software	2
Logical UI/UX design	5
Logical workflows for users	3

We are using the Fibonacci sequence for story points – Based on Risk, Complexity and Repetition

Examples of story points below:

1 - Simple feature change

2 – Simple feature implementation

3 – Medium feature implementation

5 – Site wide feature change or implementation requiring planning that could have moderate impact if not completed

8 – Site wide feature change or implementation requiring planning that could have moderate impact if not completed
